## EDUCATION

### Tufts University

Master of Science in Data Analytics | GPA: 3.96

**Coursework:** Machine Learning, Big Data, Data Science for Urban Sustainability, Database Design & SQL, Adv. Statistics I & II

**Teaching Assistant:** Foundation of Data Analytics (DATA200) & Introduction to Data Analytics (DATA100)

**Medford, MA, USA**

Sep 2022 – May 2024

### National Institute of Technology Warangal

Bachelor of Technology in Mechanical Engineering

**Warangal, India**

Aug 2016 – Aug 2020

## EXPERIENCE

### Paragon Corporation, MA, USA

Data Analyst

**Boston, MA, USA**

Jan 2025 – Present

- Streamlining the ETL process for clients' payroll data by extracting information from Excel/PDF files, transforming it into a standardized format, and loading it into a PostgreSQL database using Python and SQL scripts.

### Success Academy Charter Schools

Data Analyst

**New York, NY, USA**

July 2024 – Jan 2025

- Reduced feedback turnaround time by 85%, enabling faster teaching adjustments and improving student outcomes by automating the generation of academic reports in Google Sheets, delivered to the school leadership and teachers.

### Data Intensive Studies Center, Tufts University

Research Intern ([Poster](#))

**Medford, MA, USA**

Jan 2024 – May 2024

- Developed a novel approach to detect rare tumor cell clusters in blood by training a random forest classifier using a correlation-based feature-engineered light scattering data (Accuracy, Precision, TPR, TNR: ~90%).

### JPMorgan Chase & Co.

Data Science Intern, Credit Risk Modeling

**Wilmington, DE, USA**

Jun 2023 – Sep 2023

- Reduced the documentation and approval time by 30% (est.) for small business credit applications with less than \$250K exposure by eliminating the need for additional guarantors' information, thereby improving customer experience.
- Developed this strategy by building and analyzing the performance of two XGBoost classifiers (one with and one without additional guarantors' indicators) on various data segments using PySpark on the AWS platform.

### Data Analytics Department, Tufts University

Graduate Research Assistant ([Website](#))

**Medford, MA, USA**

Jan 2023 – Apr 2023

- Automated 80% of the named entity tagging process of D'Arcy Thompson's Glossary of Greek Birds book (second edition) to make it accessible to the general audience using XML text processing and NLP techniques.

### Citigroup

Software Developer, Personal Banking & Wealth Management Technology

**Chennai, India**

Aug 2020 – Jul 2022

- Increased the efficiency of personal loan processing by simplifying the workflows in the core banking systems.
- Eliminated the manual processing of reports with an automated system to convert them to dashboards using VBA.

### Language Technologies Research Center, IIIT Hyderabad

Research Intern ([Repository](#))

**Hyderabad, India**

May 2019 – July 2019

- Reduced the perplexity by 16% compared to the SOTA sentence simplification model by training a Seq2Seq model using the WIKISPLIT dataset with reward (BLEU score) augmented maximum likelihood objective function.

### Reliance Jio Infocomm Limited

Data Science Intern

**Mumbai, India**

May 2018 – July 2018

- Boosted the search efficiency of an internal platform used for resolving network coverage issues by building related search (NCD algorithm), auto-complete (N-Grams), and recommendation (TF-IDF & cosine similarity) features.

### SPI Cinemas Private Limited

Data Science Intern

**Chennai, India**

Nov 2017 – Dec 2017

- Decreased the turnover rate by 30% (est.) by pioneering a data-driven hiring strategy and developing a random forest classifier (87% accuracy) to predict the likelihood of frontline staff leaving within the first three months.

## TECHNICAL SKILLS

**Competencies:** Linear & Logistic Regression, Tree-Based Methods, Ensemble Learning, Neural Networks, CNNs, Text Processing, Word Embedding, LSTM, Hypothesis Testing, SHAP, Partial Dependence Plots

**Programming Languages:** Python, R, SQL, MATLAB, Visual Basic for Applications (VBA), C++

**Tools/Libraries:** GCP (BigQuery), AWS (S3, SageMaker, EMR), Tableau, Power BI, R Shiny, NumPy, Pandas, Matplotlib, Scikit-Learn, PySpark, GeoPandas, PySAL, PyTorch, TensorFlow, ggplot2, Linux, Git, Jira, Excel, Powerpoint
